Manufacturer :

What is Yondelis:

Yondelis (Yondelis) is a cancer medicine that interferes with the growth and spread of cancer cells in the body. Yondelis is used to treat lip sarcoma, a rare type of cancer that grows in fatty tissues of the body. Yondelis operates a rare fast-increasing type of cancer, leiomyosarcoma that increases in many tissues of the body, including fat, muscle, bone, joints, and blood vessels. Yondelis is used to treat cancer that has spread to other parts of the body or cannot be treated with surgery.

Side effects of Yondelis:

Some side effects may create that mostly do not need medical attention. These side effects may get away because of treatment as your body regulate to the medicine. Also, your health care professional may be able to tell you about ways to prevent or reduce some of these side effects. Confirm with your doctor if any of the following side effects continue or are bothersome or if you have any questions about them: More common Diarrhea difficulty having a bowel movement (stool) decreased appetite headache trouble sleeping.

Uses of Yondelis:

Trabectedin is used to treat certain types of cancer. It is a chemotherapy drug that works by slowing the growth of cancer cells.

Read the Patient Information Leaflet if available from your pharmacist before you start using trabectedin and before each treatment. If you have any questions, ask your doctor or pharmacist.

This medication is given by injection into a large vein (central line) by a care professional. It is usually given every 3 weeks.
